

DEPARTMENT OF DEFENSE—MILITARY

Fiscal Year 2002 Department of Defense spending represents a current services baseline budget, adjusted for initiatives in military pay, housing, and research and development. It also includes the transfer of the Maritime Security program from the Department of Transportation's Maritime Administration and other adjustments as described in the affected accounts.

All FTE estimates reflect a current services budget. Planned FTE reductions are not included in the 2002 figures.

MILITARY PERSONNEL

ACTIVE FORCES

These appropriations finance the personnel costs of the active duty forces of the Army, Navy, Marine Corps, and Air Force. They include pay and allowances of officers, enlisted personnel, cadets and midshipmen, permanent change of station travel and other military personnel costs. Changes in requirements are primarily related to changes in military strengths and military pay increases. In addition, these appropriations finance the future retirement benefits of current active duty service members. While most of the costs financed by these appropriations are set by statute or executive order, the estimates reflect efforts to improve management, including the re-engineering of military travel, significant use of bonus programs, and the implementation of audit recommendations. They also reflect the cost of personnel initiatives contained in the President's Fiscal Year 2002 legislative program.

The request includes \$1 billion for a Presidential initiative to increase military compensation. It also includes an additional \$385 million to ensure full funding for a 4.6% increase in basic pay for service members. The additional funding is included throughout the accounts, with the \$1 billion available for reallocation by the Secretary of Defense at his discretion to address quality of life, enlistment, and retention issues. Further detail about how this money will be spent will be provided after the results of the defense strategy review currently underway.

The additional funding included in the military personnel accounts is as follows:

(In millions of dollars)	
Military Personnel, Army	394.5
Military Personnel, Navy	328.2
Military Personnel, Marine Corps	126.3
Military Personnel, Air Force	334.4
Reserve Personnel, Army	45.6
Reserve Personnel, Navy	29.2
Reserve Personnel, Marine Corps	8.3
Reserve Personnel, Air Force	18.0
National Guard Personnel, Army	70.0
National Guard Personnel, Air Force	30.5

Resources shown under the Military Personnel Title contribute to achieving the Department's corporate goals. A detailed description of these goals will be provided in a separate 2002 Government Performance and Results Act performance plan that will be submitted after the Secretary of Defense's strategy review.

RESERVE FORCES

These appropriations finance the personnel costs of the National Guard and Reserve forces, including the future retirement benefits of the current Reserve forces. The estimates reflect continuing efforts to improve management efficiency including, for example, more economical use of training and recruiting resources as well as the undertaking of active missions at lower costs.

The number of National Guard and Reserve personnel estimated to participate in the Selected Reserve training programs and the number of full-time active duty military personnel provided for are summarized in the following table.

The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of 3 years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship re-

cipients will fulfill their entire obligation in the Reserve components.

The Armed Forces health professions scholarship program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the cost of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay, allowances and travel costs. Included are amounts for training and operation costs, pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army and Marine Corps divisions, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation. The upcoming strategy review will continue to place special emphasis on ensuring adequate funding for all programs that contribute directly or indirectly to the readiness of our armed forces. This includes assessing our military readiness and the relationship between readiness and operation and maintenance program funding levels.

Resources presented under the Operation and Maintenance title contribute to achieving the Department's corporate goals. A detailed description of the corporate goals will be provided in a 2002 Government Performance Results Act performance plan that will be submitted after the Secretary's strategy review.

The Defense Health Program provides care to present and retired members of the armed forces, their dependents, and other eligible beneficiaries. Beneficiaries may obtain care from Army, Navy, and Air Force facilities or through the civilian health care network under the TRICARE program. Beneficiaries who are also eligible for Medicare may obtain care through the Military Health System beginning in 2002. The 2002 funding level for this program includes \$3.9 billion above the baseline to finance the new benefits for Medicare-eligible retirees authorized by Congress.

The Defense Health Program also manages Research and Development funds appropriated by Congress. These funds permit the Defense Department to conduct research into several areas relevant to the health of military personnel.

Medical care is provided in military facilities as follows:

	2000	2001	2002
Hospitals/Medical Centers	98	81	81
Clinics	489	514	514

These hospitals, medical centers, and clinics are staffed by:

	Staff in thousands		
	2000	2001	2002
Civilian work years	39	38	38
Military personnel	87	92	92
Percent of all active duty military personnel	6.1	6.5	6.5

The number of beneficiaries using the Defense Health Program is estimated as follows:

	Beneficiaries in thousands		
	2000	2001	2002
Active Duty Personnel	1,530	1,528	1,525
Dependents of Active Duty Personnel	2,043	2,056	2,050

Retirees and dependents of retirees over age 65	375	1,431	1,477
Total estimated Defense Health Program user population	5,854	6,897	6,915

Changes over time in the estimated number of users of the Defense Health Program largely reflect changes in the eligible population.

The defense environmental restoration program provides for the identification, investigation, and cleanup of contamination resulting from past DoD activities. The Department has

17,307 previously identified contaminated sites requiring no further action, leaving 8,362 active sites at 678 military installations along with approximately 2,000 projects at formerly used Defense properties. For these remaining sites and projects DoD is engaged in either a study to determine the extent of the contamination or the actual clean-up.

The Department's environmental restoration program is funded by five separate environmental restoration accounts, one for each military department, one for defense agencies and one for formerly used defense sites. These five decentralized accounts include restoration activities from preliminary assessment and site planning to studies, then clean-up and finally closeout of a site, functions formerly funded in the defense environmental restoration account.

PROCUREMENT

Appropriations in this title support the acquisition of aircraft, ships, combat vehicles, satellites and their launch vehicles, weapons and all capital equipment. Major systems in production typically are budgeted annually to maintain production continuity through the life of the acquisition program and in several instances multi-year contracts are used to ensure stability of production and economies. Initial spares and support as well as the modification of existing equipment is also funded. The funding level requested for each account in this title may change as a result of the Secretary's strategy review now underway. Furthermore, the amount of each account allocated for the National Guard and Reserve will also be determined by the review. Resources presented under the Procurement title contribute to achieving the Department's corporate goals. A detailed description of the corporate goals will be provided in an 2002 Government Performance Results Act performance plan that will be submitted after the strategy review.

Procurement in support of the ground forces encompasses wheeled and track vehicles, rotary wing aircraft, ammunition and equipment procured to meet inventory requirements dictated by the force size and anticipated attrition requirements. Similarly, procurement in support of naval forces includes ships, equipment for the ships, aircraft, munitions, the Marine Corps ground element, and other equipment to sustain future naval operations. The Air Force programs support the broad range of missions including aircraft, tactical missiles, ballistic missile weapons and associated surveillance and space assets keyed to the strategic deterrence mission munitions and other mission support equipment.

This program, first authorized in PL 102–484 (the 1992 Authorization Act), is to encourage commercial firms to use idle government owned, contractor-operated Army ammunition manufacturing facilities to ensure a viable industrial base for the manufacture of ammunition.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees committed in 1992 and beyond (including modifications of loan guarantees that resulted from commitments in any year). The amounts in this account are a means of financing and are not included in the budget totals.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Appropriations in this title support modernization through basic and applied research, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is per-

formed by contractors, government laboratories and facilities, universities and nonprofit organizations. Research and development programs are funded to cover annual needs. Resources presented under the Research, Development, Test, and Evaluation title contribute to achieving the Department's corporate goals. A detailed description of the corporate goals will be provided in a 2002 Government Performance Results Act performance plan that will be submitted after the Secretary's strategy review.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for that appropriation. The funding level requested for each account in this title may change as a result of the strategy review now underway. Funds for each fiscal year are available for obligation for a two-year period beginning on the first day of that fiscal year.

The 2002 budget provides for major technology and development efforts. These include science and technology programs, development of weapons systems and supporting systems, and support of test and evaluation programs and necessary infrastructure.

The Department will continue to emphasize technology efforts that ensure that the Nation will maintain a technological advantage over potential adversaries. The 2002 budget includes an initiative to emphasize four key areas: (1) Leap-ahead technologies for new weapons and intelligence systems; (2) Improvements to the laboratory and test range infrastructure; (3) Technologies aimed at reducing the costs of weapons and intelligence systems; and (4) Efforts that are focused on countering unconventional threats to national security. Funding is included to conduct research, development and testing of missile defenses.

MILITARY CONSTRUCTION

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 2002 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriations, with comparable amounts in 2000 and 2001. These funding levels may change as a result of the Secretary's strategy review now underway. Resources presented under the Military Construction title contribute to achieving the Department's corporate goals. A detailed description of the corporate goals will be provided in a 2002 Government Performance Results Act performance plan that will be submitted after the strategy review.

The Military Construction programs are intended to provide facilities required as a result of new weapon systems entering the inventory including aircraft and naval vessels, to support chemical demilitarization and other high priority initiatives. The program continues initiatives to improve living and working conditions, reduce operating costs, increase productivity, and conserve energy by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient through relatively modest investments in improvements. Also included in this request are resources required to clean up and dispose of property consistent with the four closure rounds required by the Base Closure Acts of 1988 and 1990, and the expected land revenues which partially offset the one-time costs of closures.

FAMILY HOUSING, DEFENSE

These appropriations finance all costs associated with construction, improvements, operations, maintenance and leasing of all military family housing. In addition to quality of life enhancements, the program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The Family Housing Improvement Fund (FHIF) was created to finance the use of innovative methods authorized in the Housing Revitalization Act (HRA), P.L. 104–106, to meet the Department's housing needs. The HRA authorizes the Department to use limited partnerships, make direct and guaranteed loans, and convey Department-owned property to stimulate the private sector to increase the availability of affordable, quality housing for military personnel. The Department's goal is to increase its reliance on the private sector to provide quality housing for all military personnel much sooner than possible with traditional family housing programs at currently planned funding levels.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. The funding level required for each account in this title may change as a result of the Secretary's strategy review which is currently underway.

Resources presented under the Family Housing, Defense title contribute to achieving the Department's corporate goals. A detailed description of the corporate goals will be provided in a 2002 Government Performance and Results Act performance plan that will be submitted after the strategy review.

The National Defense Stockpile is planned and operated under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude a dangerous and costly dependence by the United States upon foreign sources for supplies of strategic and crit-

ical materials in times of national emergency. The quantities of the materials stockpiled as required by the Stockpiling Act are to be sufficient to sustain the United States during a national emergency involving military conflict that necessitates an expansion of the Armed Forces together with a significant mobilization of the economy of the United States.

The National Defense Stockpile Transaction Fund provides for the financing of acquisition, disposal and upgrading of strategic and critical stockpile materials, and all related expenses such as transportation, development of specifications, testing, quality studies, and relocation of materials, and operation of the Defense National Stockpile Center.

This fund pays claims and administrative costs for participating members of the insurance program. The program provided insurance coverage for Ready Reservists who elected to participate and who were involuntarily ordered to active duty in excess of 30 days. The program became operational on October 1, 1996. The program was terminated on November 18, 1997 by the National Defense Authorization Act of 1998 (P.L. 105-85). The 1998 Supplemental provided funding to complete benefit payments and close out the program.

Section 1175 of Title 10, United States Code, enacted by section 662 of the National Defense Authorization Act for Fiscal Years 1992 and 1993, Public Law 102–190, established the Voluntary Separation Incentive (VSI) Fund to help manage the ongoing military force drawdown. VSI provides annual payments to selected active-duty Service members with more than six but less than 20 years of service who leave the service voluntarily. The Section 1175(h)(3) provided that after December 31, 1992, all voluntary separation incentive payments shall be made from the fund. The fund is financed through actuarially-determined Government contributions from the Department of Defense personnel appropriations to cover the unfunded liability and the present value of future benefits for those separating and interest on the investments. The total present value costs of VSI benefit payments must be deposited in the fund by the time authority to approve VSI benefits ends, December 31, 2001. Permanent authority to make these payments is contained in section 8044 of the 1997 Defense Appropriations Act.

The National Security Education Act of 1991 established a program for undergraduate scholarships, graduate fellowships, and grants to educational institutions in critical area studies, foreign languages and other international fields.

This program enhances the quality of U.S. educational programs in these fields by making it possible for more American students to study abroad. The programs will develop a larger pool of potential U.S. Government employees with knowledge of particular cultures, languages, and governments. The program is carried out by the Secretary of Defense in consultation with the National Security Education Board. The Board establishes the criteria for awards.

[SEC. 323. **FORT IRWIN NATIONAL TRAINING CENTER EXPANSION.** (a) **FINDINGS.**—Congress makes the following findings:

(1) The National Training Center at Fort Irwin, California, is the only instrumented training area in the world suitable for live fire training of heavy brigade-sized military forces and thus provides the Army with essential training opportunities necessary to maintain and improve military readiness and promote national security.

(2) The National Training Center must be expanded to meet the critical need of the Army for additional training lands suitable for the maneuver of large numbers of military personnel and equipment, which is necessitated by advances in equipment, by doctrinal changes, and by Force XXI doctrinal experimentation requirements.

(3) The lands being considered for expansion of the National Training Center are home to the desert tortoise and other species that are protected under the Endangered Species Act of 1973, and the Secretary of Defense and the Secretary of the Interior, in developing a plan for expansion of the National Training Center, must provide for such expansion in a manner that complies with the Endangered Species Act of 1973, the National Environmental Policy Act of 1969, and other applicable laws.

(4) In order for the expansion of the National Training Center to be implemented on an expedited basis, the Secretaries should proceed without delay to define with specificity the key elements of the expansion plan, including obtaining early input regarding national security requirements, Endangered Species Act of 1973 compliance and mitigation, and National Environmental Policy Act of 1969 compliance.

(b) **PURPOSE.**—The purpose of this section is to expedite the expansion of the National Training Center at Fort Irwin, California, in a manner that is fully compliant with environmental laws.

(c) **PREPARATION OF PROPOSED EXPANSION PLAN.**—

(1) **PREPARATION REQUIRED.**—The Secretary of the Army and the Secretary of the Interior (in this section referred to as the “Secretaries”) shall jointly prepare a proposed plan for the expansion of the National Training Center at Fort Irwin, California.

(2) **SUBMISSION AND AVAILABILITY.**—The plan required by paragraph (1) (in this section referred to as the “proposed expansion plan”) shall be completed not later than 120 days after the date of the enactment of this Act. When completed, the Secretaries shall make the proposed expansion plan available to the public and shall publish in the Federal Register a “notice of availability” concerning the proposed expansion plan.

(d) **KEY ELEMENTS OF PROPOSED EXPANSION PLAN.**—

(1) **JOINT REPORT.**—Not later than 45 days after the date of the enactment of this Act, the Secretaries shall submit to Congress a joint report that identifies the key elements of the proposed expansion plan.

(2) **LANDS WITHDRAWAL AND RESERVATION.**—The proposed expansion plan shall include the withdrawal and reservation of an appropriate amount of public lands for—

- (A) the conduct of combined arms military training at the National Training Center;
- (B) the development and testing of military equipment at the National Training Center;
- (C) other defense-related purposes; and
- (D) conservation and research purposes.

(3) **CONSERVATION MEASURES.**—The proposed expansion plan shall also include a general description of conservation measures, anticipated to cost approximately \$75,000,000, that may be necessary and appropriate to protect and promote the conservation of the desert tortoise and other endangered or threatened species and their critical habitats in designated wildlife management areas in the West Mojave Desert. The conservation measures may include—

- (A) the establishment of one or more research natural areas, which may include lands both within and outside the National Training Center;
- (B) the acquisition of private and State lands within the wildlife management areas in the West Mojave Desert;
- (C) the construction of barriers, fences, and other structures that would promote the conservation of endangered or threatened species and their critical habitats;
- (D) the funding of research studies; and
- (E) other conservation measures.

(d) **PRELIMINARY REVIEW OF EXPANSION PLAN.**—

(1) **REVIEW REQUIRED.**—Not later than 90 days after the date of the enactment of this Act, the Director of the United States Fish and Wildlife Service shall submit to the Secretaries a preliminary review of the proposed expansion plan (as developed as of that date). In the preliminary review, the Director shall identify, with as much specificity as possible, an approach for implementing the proposed expansion plan consistent with the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(2) **RELATION TO FORMAL REVIEW.**—The preliminary review under paragraph (1) shall not constitute a formal consultation under section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536), but shall be used to assist the Secretaries in more precisely defining the nature and scope of an expansion plan for the National Training Center that is likely to satisfy requirements of the Endangered Species Act of 1973 and to expedite the formal consultation process under section 7 of such Act.

(3) **CONSIDERATION OF PRELIMINARY REVIEW.**—In preparing the proposed expansion plan, the Secretaries shall take into account the content of the preliminary review by the Director of the United States Fish and Wildlife Service under paragraph (1).

(e) **DRAFT LEGISLATION.**—The Secretaries shall submit to Congress with the proposed expansion plan a draft of proposed legislation providing for the withdrawal and reservation of public lands for the expansion of the National Training Center. It is the sense of the Congress that the proposed legislation should contain a provision that, if enacted, would prohibit ground-disturbing military use of the land to be withdrawn and reserved by the legislation until the Secretaries have certified that there has been full compliance with the appropriate provisions of the legislation, the Endangered Species Act of 1973, the National Environmental Policy Act of 1969, and other applicable laws.

(f) **CONSULTATION UNDER ENDANGERED SPECIES ACT OF 1973.**—The Secretaries shall initiate the formal consultation required under section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) with respect to expansion of the National Training Center as soon as practicable and shall complete such consultation not later than two years after the date of the enactment of this Act.

(g) **ENVIRONMENTAL REVIEW.**—Not later than six months following completion of the formal consultation required under section 7 of the Endangered Species Act of 1973 with respect to expansion of the National Training Center, the Secretaries shall complete any analysis required under the National Environmental Policy Act of 1969 with respect to the proposed expansion of the National Training Center. The analysis shall be coordinated, to the extent practicable and appropriate, with the review of the West Mojave Coordinated Management Plan that, as of the date of the enactment of this Act, is being undertaken by the Bureau of Land Management.

(h) **FUNDING.**—

(1) **IMPLEMENTATION OF CONSERVATION MEASURES.**—There are authorized to be appropriated \$75,000,000 to the Secretary of the

Army for the implementation of conservation measures necessary for the final expansion plan for the National Training Center to comply with the Endangered Species Act of 1973.

(2) **IMPLEMENTATION OF SECTION.**—The amounts of \$2,500,000 for “Operation and Maintenance, Army” and \$2,500,000 for “Management of Lands and Resources, Bureau of Land Management” are hereby appropriated to the Secretary of the Army and the Secretary of the Interior, respectively, only to undertake and complete on an expedited basis the activities specified in this section. *[Division A, Miscellaneous Appropriations Act, 2001, as enacted by section 1(a)(4) of P.L. 106-554.]*
